

Workforce Central

Workforce Mobile

The power of Workforce Central on your device

The Kronos® Workforce Mobile™ solution is a connection to your Workforce Central® system that lets your employees complete common administrative tasks right from their mobile devices. With on-the-go access, your employees can instantly engage, make effective decisions, take action, and increase day-to-day productivity. Mobile workforce management will fundamentally change the way that your workforce interacts and connects with your organization.

Workforce Mobile empowers employees and managers by giving them untethered access to Workforce Central in a sleek, easy-to-use format. The simplicity of mobile functionality allows users to access Workforce Central with virtually no training. Workforce Mobile takes full advantage of multi-touch capabilities so that users can easily navigate through data and make labor adjustments — using a simple tap, pinch, or swipe of a finger.

Gain the Visibility You Need: Whenever, Wherever

When is my shift? Can I take a day off? Which department did I work in last Tuesday? With Workforce Mobile, employees and managers can quickly and easily get answers to these questions and more, right on their devices. That means less time spent digging for answers to administrative issues and more time spent on work activities that contribute to your organization’s success. Managers can easily see requests and tasks and rapidly respond to potential workforce management issues, while employees can perform their time management tasks when and where they need to.

Boost Employee Engagement

Enabling employee self-service on a mobile device gives employees an easy way to get answers to information on workforce questions and situations that come up every day. Employees can clock in and out, view schedules, adjust availability and preferences, check time-off balances, sign up for open shifts, view benefits and pay information, and request days off.

Workforce Mobile employee self-service makes it easier than ever for employees to get the information they need. When employees have anytime, anywhere access to information, they feel valued and treated fairly. And when employees feel valued, they become more engaged and are more likely to give an extra effort to your organization — leading to increased productivity and better business outcomes.

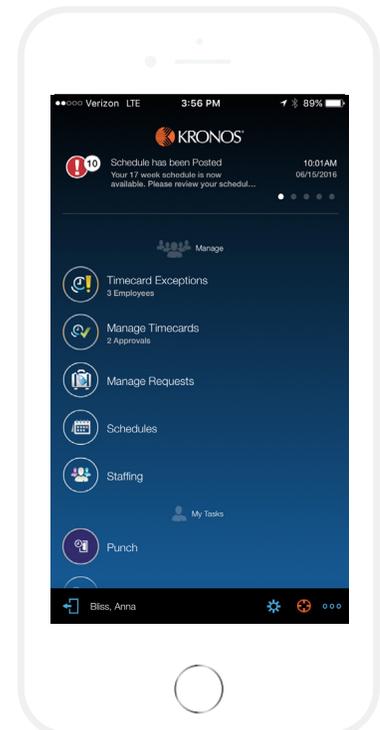

Benefits for a Remote Workforce

Why make your people go into the office if they don’t need to? Workforce Mobile enables your field and off-site employees to access the same deep functionality available on their desktop or laptop computer.

Key Benefits

- » **EMPOWER YOUR EMPLOYEES** to submit requests, approve timecards, submit punches, conduct transfers, track detailed labor activity, and more
- » **ALLOWS MANAGERS TO RESOLVE EXCEPTIONS** as they happen and quickly respond to employee requests
- » **LEVERAGE GPS-BASED TECHNOLOGIES** like geofencing and geosensing to access information based on location

Deploying a mobile solution to remote workers also lets managers eliminate the time and expense of manually inputting hours for field and off-site employees. Managers can easily schedule the right person for the right job at the right time — creating countless opportunities to increase your organization's competitive advantage.

Real-Time Tools for Managers

Workforce Mobile gives your managers and supervisors greater visibility into the organization — allowing them to resolve exceptions as they happen, approve timecards, and quickly respond to employee requests. With added visibility, communication with employees improves and everyday workforce management tasks get resolved quickly and accurately.

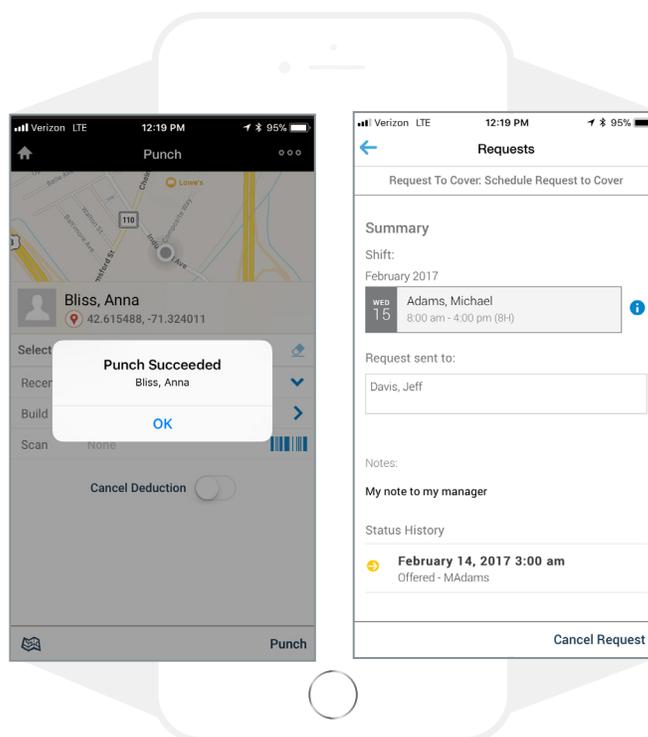

By leveraging mobile solutions, managers and employees don't have to wait to use a PC or run to a back office to correct an issue. Instead, they have the power to get the answers they need right away, which means less time looking for answers and more time focusing on job priorities.

Technical Specifications

Workforce Mobile requires Apple® devices to run iOS8.0 or greater and Android™ smartphones to run at least version 4.4 of the Google-distributed Android operating system. Note that older devices with lower resolutions can influence usability.
